Mission Statement
In October 2017, the West Virginia Counties of Clay, Calhoun and Roane formally united as the CCR Broadband Development Committee to research methodologies, examine technologies, and seek funding to empower a public/private partnership, with a stated goal to overcome our mountainous terrain and socioeconomic barriers to bring Broadband to our unserved and underserved areas.

Let's Get Connected!

Broadband Internet for Rural West Virginia
Concerned citizens of Clay, Calhoun, and Roane counties of West Virginia formally joined forces to plan, develop opportunities, and seek funding for broadband deployment, utilizing a public/private/partnership model, with support from the Regional Intergovernmental Council, Mid-Ohio Valley Regional Council, the three County Commissions, and the respective County Economic Development Authorities.

This is a community effort and we need your help!

What Broadband Does For You:

Available, reliable, and fast Internet service:

• Makes our Counties and Businesses competitive in attracting business, people, ideas, and investment;
• Provides enhanced educational opportunities for you and your children;
• Provides social interaction tools to strengthen our communities;
• Increases engagement between governments and citizens;
• Enhances emergency services;
• Increases home values;
• Extends the reach of healthcare and brings down costs;
• Empowers business and entrepreneurship;
• Promotes rural businesses;
• Delivers entertainment choices;
• Enables home security systems;
• Allows people to work and shop from home; and
• Gives access to online banking.

The term, "Broadband" means speeds of 25Mbps download and 4Mbps upload minimum, and complies with the 2015 Broadband Progress Report issued by the Federal Communications Commission.

"For our country to take full advantage of the promises of innovation, America’s path forward must ensure our people and ideas can move at the rapid pace of the 21st century. At a time when technological innovation and economic growth go hand-in-hand, our digital infrastructure is central to our competitiveness."

Here’s How You Can Help!

We need to know what service providers and Internet options you have, what your speeds and price are. We have set up several ways you can provide us with your information. Please provide as much detail as you can, especially your 911 address. This information is extremely helpful.

Visit Us Online:
www.bb4wv.org
www.FaceBook.com/bb4wv

Call Us With Your Story:
304-278-4754 (record your story)

Write a Letter:
Send it to the address on this brochure; please include your contact information with 911 address, and what broadband choices you have (or don’t have!) in your area. Pricing, speed, packages, promises made, and services delivered are all important details.

Take a Speed Test:
Go to our website, bb4wv.org, read the instructions and take a speed test - often! The data is invaluable to our planning efforts.
